PROJECTS

Baba is You (C++, QT, Catch2) - [GitHub](#) - 2023

- Designed and conceived a C++ implementation of the 5 first levels of the game Baba Is You
- Made two different views for the same model: console-based and GUI with QT Widget
- Wrote Catch2 tests that covered code

Social Network Clone (Laravel, PHP) - [GitHub](#) - 2023

- Designed and conceived a clone of a simple social network with basic features
- Allowing to login/register, chatroom system, CRUD posts, adding friends and receive notifications

StibRide (Java, JavaFX, JUnit, Maven) - [GitHub](#) - 2023

- Designed and conceived a fully documented Java app to calculate a route by metro in Brussels
- Applied MVC and other design patterns; implemented the model by applying object-oriented principles
- Using API and token to receive next metros in real-time
- Wrote Junit/Mockito tests that covered near 80% of all model-related lines of code

WORK EXPERIENCE

Financial Information Processing Unit (C.T.I.F.)

Brussels, Belgium

- Installed and replaced hardware equipment
- Administrative support in databases
- Improved quality of life of 5+ employees by encoding tickets
